## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The information disclosure statement filed 1-11-02 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. It has been placed in the application file, but the information referred to therein has not been considered.

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 5, 6, 11, and 12 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. There is no description in the specification as to what "electric units" and "generator" describe. How are these limitations different? For the purposes of examination these two limitations are assumed to mean sensors.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 through 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Volkswagen official factory repair manual for model year 1999 Jetta/Golf/GTI.
3. As per claims 1 and 7, Volkswagen discloses means for storing a plurality of control parameters for the different vehicle versions, means for storing a version coding for customizing the vehicle controller for a predetermined vehicle version on pages 1-29 through 1-33, the version coding having a plurality of bit positions on page 1-30, and means for indirect selection of control parameters by algorithmic processing of values of a plurality of bit positions of the version coding on page 1-32.
4. As per claims 2 and 8, Volkswagen discloses further comprising means for direct selection of control parameters from the means for storing control parameters as a function of values of individual bit positions of the version coding page 1-32.
5. As per claims 3, 4, 9 and 10, Volkswagen discloses the means for selection is adapted to read control parameters which are contained in the version coding on page 1-29.
6. As per claims 5, 6, 11, and 12, Volkswagen discloses the control parameters pertain to characteristic values of electric units and generators on page 1-32. Which sensors that are present in a vehicle are programmed into the cluster as being present.

### ***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 3661

8. Berger et al., 6061617, disclose adaptable controller for a work vehicle attachment.
9. Aldrich, III et al., 6529805, disclose methods and apparatus for configuring an automobile electronic control module.
10. Robinson, 6360145, discloses vehicle platform-portable controller.
11. Haack et al., 6167337, disclose reconfigurable control unit for work vehicles.
12. Gormley, 5513107, discloses methods and apparatus for controlling operating subsystems of a motor vehicle.
- 13.** Moore-McKee et al., 6269300, disclose method for producing production control software for a natural gas or diesel engine controller.
